The Technology

The Air Scrubber Plus by Aerus substantially reduces odors, visible smoke in the air and microbial populations on surfaces*, by utilizing its patent-pending ActivePure® Technology. This technology consists of a special UV light and photocatalyst target, creating an advanced oxidation process containing several friendly oxidizers. Certified space technology continuously protects and purifies the air and attacks contaminants on all surfaces.

9960051/9960052 Air Scrubber

- Duct- or plenum-installed natural air system
- Discreet or concealed installation
- 100/277V option available
- UV bulb monitoring indicator included
- Low maintenance - no cleaning required
- Input voltage: 24V, 1A
- Distribution via air handler or safety switch installed
- Operating temp: 32-200°F
- Operating temp: 93°C

2017 Space Technology
Hall of Fame Inductee

The ActivePure® Technology built into each Aerus Pure & Clean+ is based on a variation of the technology originally developed for use on the International Space Station and is recognized as the exclusive Certified Space Technology™ in its category.

Pure & Clean+

This revolutionary air purifier substantially reduces odors, visible smoke from the air and microbial populations on surfaces commonly found in the average home or office environment. The unit features a new and improved patented ActivePure® cell design that delivers ActivePure® faster to surrounding air and surfaces. Plus, the Pure & Clean (00747) is portable and has a switch to turn the ozone on or off.

- Positive and negative multipoint and RF ion generation
- Five-speed fan
- Adjustable purifier control (A·PURE+ only)
- Replaceable ActivePure® cell

Laundry Pro 2.0

The Laundry Pro 2.0 incorporates the power of ActivePure® technology with the cleaning action of water with hydrogen and oxygen-based oxidizers to lift dirt and grime away from the fibers of fabric and prevent the growth of odor-causing bacteria. This amazingly effective cold water laundry system for residential use prevents allergic reactions caused by detergents. Based on processes used for over a decade in hospitals, hotels and laundromats, this technology leaves clothes brighter and cleaner.

- 0.4W AC (standby mode); 1.3W AC (operating)
- AC in: 100-240V ~50/60 Hz 0.45A
- DC out: 12V 2.5A
- Use cold water only (do not use hot water)
- 50-100°F
- Operating humidity: 40-85%
